DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 5 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 5 line 2, it is unclear what is meant by “wherein the or each body part...” means.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-3, 5-14, and 16-20 are rejected under 35 U.S.C. 102(b) as being anticipated by HARRIS (US 2378847).

HARRIS discloses a method and apparatus for harvesting produce (1) which is moved by means of rotatable members (2, 3). A body support element (4) supports a picker (see Fig. 1). While the apparatus is moving in a first direction (2), the support element can be moved vertically by means of a moving assembly (9, 11).

Regarding claims 2 and 20, a plurality of body support elements is shown in Fig. 2 of HARRIS.

Regarding claim 3, the range of movement can be inferred from the proportions of the human figure shown in Fig. 1, which can be assumed to be 1.5 – 2 m in height (or length, since the figure is illustrated prone).

Regarding claim 6, the runners (6) of HARRIS are being read as the claimed “pair of linear runners”.

Regarding claim 10, the claimed “collection area” and “conveyor system” is being read on the chute (36) and collection area in HARRIS (see Fig. 3).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 4 and 15 is rejected under 35 U.S.C. 103(a) as being unpatentable over HARRIS.

HARRIS discloses a method and apparatus for harvesting produce, as described above.

HARRIS does not disclose the use of a motor to move the support element or the use of sensors to control the speed of the apparatus.

However, Fig. 1 of HARRIS shows the support member being moved manually by means of pedals and gears (12, 14, 18). It would have been obvious to one of ordinary skill in the art at the time the invention was made to use a motor to accomplish this motion in order to reduce strain on the user, since it has been held that broadly providing a mechanical or automatic means to replace manual activity which has accomplished the same result involves only routine skill in the art.

Regarding claim 15, Applicant is given Official Notice that the use of sensors to guide robotic movers is well known in the packaging art and it would also have been obvious to one of ordinary skill in the art at the time the invention was made to add such sensors to the invention of HARRIS in order to provide extra safety for the user. Examiner also notes that it has been held that broadly providing a mechanical or automatic means to replace manual activity which has accomplished the same result involves only routine skill in the art.
